Personal Profile

My name is Ahmed and I'm an aspiring front end web developer. I just graduate from a 16-week developer bootcamp where I have worked on two major projects coding in JavaScript ES6, HTML, CSS Bootstrap, jQuery and react. I also code in my spare time to further my knowledge of coding. I am a positive, can-do person and I enjoy finding ways to make things run more efficiently in all aspects of life. I enjoy and take pride in overcoming challenges.
